

SAFETY DATA SHEET GAMMA-OCTALACTONE, NATURAL

According to Appendix D, OSHA Hazard Communication Standard 29 CFR §1910.1200

1. Identification		
Product identifier		
Product name	GAMMA-OCTALACTONE, NATURAL	
Product number	W2270N	
Synonyms; trade names	4-Hydroxy octanoic acid, γ-Octanoic lactone, Octano-1,4-lactone	
CAS number	104-50-7	
Recommended use of the chemical and restrictions on use		
Application	Laboratory chemicals, Manufacture of substances.	
Uses advised against	No specific uses advised against are identified.	
Details of the supplier of the safe	ty data sheet	
Supplier	Synerzine 5340 Highway 42 Ellenwood, GA 30294 (404) 524-6744 info@synerzine.com	
Contact Person	James Elliott	
Emergency telephone number		
Emergency telephone	INFOTRAC 1-800-535-5053 (Reference Contract # 102471)	
2. Hazard(s) identification		
Classification of the substance or	mixture	
Physical hazards	Not Classified	
Health hazards	Skin Irrit. 2 - H315	
Environmental hazards	Not Classified	
Label elements		
Hazard symbols		
Signal word	Warning	
	···anning	
Hazard statements	H315 Causes skin irritation.	

This substance is not classified as PBT or vPvB according to current EU criteria.

3. Composition/information on ingredients	
Substances	
Product name	GAMMA-OCTALACTONE, NATURAL
CAS number	104-50-7
Composition comments	Named component present at ≤100%.
4. First-aid measures	
Description of first aid measures	
General information	Get medical attention immediately. Show this Safety Data Sheet to the medical personnel.
Inhalation	Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.
Ingestion	Rinse mouth thoroughly with water. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Place unconscious person on their side in the recovery position and ensure breathing can take place. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.
Skin Contact	Rinse with water.
Eye contact	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.
Protection of first aiders	First aid personnel should wear appropriate protective equipment during any rescue. Wash contaminated clothing thoroughly with water before removing it from the affected person, or wear gloves. It may be dangerous for first aid personnel to carry out mouth-to-mouth resuscitation.
Most important symptoms and effe	ects, both acute and delayed
General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Inhalation	Prolonged inhalation of high concentrations may damage respiratory system.
Ingestion	May cause irritation.
Skin contact	Redness. Irritating to skin.
Eye contact	May cause temporary eye irritation.
Indication of immediate medical at	tention and special treatment needed
Notes for the doctor	Treat symptomatically.
5. Fire-fighting measures	
Extinguishing media	
Suitable extinguishing media	The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Special hazards arising from the s	ubstance or mixture
Specific hazards	Containers can burst violently or explode when heated, due to excessive pressure build-up.
Hazardous combustion products	Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors.

Protective actions during firefighting	Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities.
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Standard Firefighter's clothing including helmets, protective boots and gloves will provide a basic level of protection for chemical incidents.

Personal precautions, protective equipment and emergency procedures

Personal precautions	No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material.		
Environmental precautions			
Environmental precautions	Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).		
Methods and material for contain	Methods and material for containment and cleaning up		
Methods for cleaning up	Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Approach the spillage from upwind. Small Spillages: If the product is soluble in water, dilute the spillage with water and mop it up. Alternatively, or if it is not water-soluble, absorb the spillage with an inert, dry material and place it in a suitable waste disposal container. Large Spillages: If leakage cannot be stopped, evacuate area. Flush spilled material into an effluent treatment plant, or proceed as follows. Contain and absorb spillage with sand, earth or other non-combustible material. Place waste in labeled, sealed containers. Clean contaminated objects and areas thoroughly, observing environmental regulations. The contaminated absorbent may pose the same hazard as the spilled material. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.		
Reference to other sections	For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.		
7. Handling and storage			
Precautions for safe handling			
Usage precautions	Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimize spills. Keep container tightly sealed when not in use. Avoid the formation of mists. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment.		
Advice on general occupational hygiene	Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.		
Conditions for safe storage, inclue	ding any incompatibilities		
Storage precautions	Store away from incompatible materials (see Section 10). Store in accordance with local regulations. Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage. Utilize retaining walls to prevent soil and water pollution in the event of spillage. The storage area floor should be leak-tight, jointless and not absorbent.		
Storage class	Chemical storage.		

8. Exposure controls/Personal protection Ingredient comments No of the second secon	exposure limits known for ingredient(s).
Ingredient comments No a Exposure controls Protective equipment Appropriate engineering controls Protective equipment Protective equipment Protectiv	exposure limits known for ingredient(s).
Exposure controls Protective equipment OPDOT OPD	bovide adequate ventilation. Personal, workplace environment or biological monitoring may be required determine the effectiveness of the ventilation or other control measures and/or the necessity to use spiratory protective equipment. Use process enclosures, local exhaust ventilation or other engineering introls as the primary means to minimize worker exposure. Personal protective equipment should only used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure introl measures are regularly inspected and maintained. Ensure operatives are trained to minimize posure.
Protective equipment Protective equipment Appropriate engineering controls Protective	determine the effectiveness of the ventilation or other control measures and/or the necessity to use spiratory protective equipment. Use process enclosures, local exhaust ventilation or other engineering ntrols as the primary means to minimize worker exposure. Personal protective equipment should only used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure ntrol measures are regularly inspected and maintained. Ensure operatives are trained to minimize posure.
Appropriate engineering controls Proto do resp	determine the effectiveness of the ventilation or other control measures and/or the necessity to use spiratory protective equipment. Use process enclosures, local exhaust ventilation or other engineering ntrols as the primary means to minimize worker exposure. Personal protective equipment should only used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure ntrol measures are regularly inspected and maintained. Ensure operatives are trained to minimize posure.

Ensure operatives are trained to minimize posure.
con	
is p 191	ewear complying with an approved standard should be worn if a risk assessment indicates eye contact possible. Personal protective equipment for eye and face protection should comply with OSHA 10.133. Unless the assessment indicates a higher degree of protection is required, the following ptection should be worn: Tight-fitting safety glasses.
ass. with glov den the	emical-resistant, impervious gloves complying with an approved standard should be worn if a risk sessment indicates skin contact is possible. The most suitable glove should be chosen in consultation th the glove supplier/manufacturer, who can provide information about the breakthrough time of the ove material. To protect hands from chemicals, gloves should comply with OSHA 1910.138 and be monstrated to be impervious to the chemical and resist degradation. Considering the data specified by a glove manufacturer, check during use that the gloves are retaining their protective properties and ange them as soon as any deterioration is detected. Frequent changes are recommended.
• • • • • • • • • • • • • • • • • • • •	propriate footwear and additional protective clothing complying with an approved standard should be rn if a risk assessment indicates skin contamination is possible.
wor Goo befo med	by b
indi its i regu rest	spiratory protection complying with an approved standard should be worn if a risk assessment licates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for intended use and is NIOSH approved. Check that the respirator fits tightly and the filter is changed gularly. Gas and combination filter cartridges should comply with OSHA 1910.134. Full face mask spirators with replaceable filter cartridges should comply with OSHA 1910.134. Half mask and quarter ask respirators with replaceable filter cartridges should comply with OSHA 1910.134.
Environmental exposure controls Kee	ep container tightly sealed when not in use.

9. Physical and chemical properties

Information on basic physical and chemical properties		
Appearance	Clear liquid.	
Color	Colorless to Yellow	
Odor	Characteristic. Sweet Creamy Coconut Creamy	
Odor threshold	Not available.	
рН	Not available.	

Melting point	Not available.
Initial boiling point and range	234°C/453°F
Flash point	> 93°C/200°F Method: Closed cup.
Evaporation rate	Not available.
Upper/lower flammability or explosive limits	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies)	Not available.
Partition coefficient	Not available.
Auto-ignition temperature	Not available.
Decomposition Temperature	Not available.
Viscosity	Not available.
Explosive properties	Not available.
Oxidizing properties	Not available.
Molecular weight	142.20 g/mol
10. Stability and reactivity	
Reactivity	See the other subsections of this section for further details.
Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.
Possibility of hazardous reactions	No potentially hazardous reactions known.
Conditions to avoid	There are no known conditions that are likely to result in a hazardous situation.
Materials to avoid	No specific material or group of materials is likely to react with the product to produce a hazardous situation.
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors.
11. Toxicological information	
Information on toxicological effects	\$
Acute toxicity - oral Summary	Based on available data the classification criteria are not met.
Acute toxicity - dermal Summary	
	Based on available data the classification criteria are not met.
Acute toxicity - inhalation Summary	Based on available data the classification criteria are not met. Based on available data the classification criteria are not met.

GAMMA-OCTALACTONE, NATURAL

13. Disposal considerations	
Waste treatment methods	
General information	The generation of waste should be minimized or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous.
Disposal methods	Do not empty into drains. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labeled with their contents. Waste packaging should be collected for reuse or recycling. Incineration or landfill should only be considered when recycling is not feasible.
14. Transport information	
General	The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, DOT).
UN Number	
UN No. (International)	Not applicable.
UN No. (DOT)	Not applicable.
UN proper shipping name	
Proper shipping name (International)	Not applicable.
Proper shipping name (DOT)	Not applicable.
Transport hazard class(es)	
Transport Labels (International)	No transport warning sign required.
DOT transport labels No transport warning sign require	d.
Packing group	
Packing group (International)	Not applicable.
DOT packing group	Not applicable.
Environmental hazards	
Environmentally Hazardous Subs	tance
Special precautions for user Not applicable.	
DOT reportable quantity	Not applicable.
DOT TIH Zone	Not applicable.
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code	Not applicable.
